NORTH PHOTO TOUR

The beautiful north of Lanzarote Island is somewhat unknown and has completely preserved countryside. We are going to take advantage of this and take some unique photos. Along the shore we can see some small idyllic fishing villages and stop by a most interesting and less visited places to take photographs. We will visit spectacular viewpoints providing breathtaking views over the islands of Archipelago Chinijo, the wild Famara beach, the Cliffs of Famara and the whole northeast of Lanzarote Island.

SOUTH PHOTO TOUR

Full of contrasts and extremely varied topography awaits us in the South of Lanzarote. With more than 25 volcanic peaks this exciting lunar landscape - The Volcanoes Nature Reserve - is a "must see" for every visitor! We have selected some viewpoints which give perfect opportunity to capture the colorful rocks and volcanoes. We will take astonishing pictures of the unique landscape of La Geria - an incredible mosaic which makes the place look almost surreal. It is there in the south where you will find bizarre natural attractions, a legacy of the destructive powers of the volcanoes and the sea.

SUNSET PHOTO TOUR

If you want something special to do in the evenings join us for an intimate sunset tour. The west coast of Lanzarote is very famous for its sunsets! Take the perfect photo, enjoying the romantic view of the setting sun. Each sunset is an artwork of nature painted across the tranquil sky. Take the best of your vacation on Lanzarote and make your photographs a masterpiece!
